WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 168
PAGE 1

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

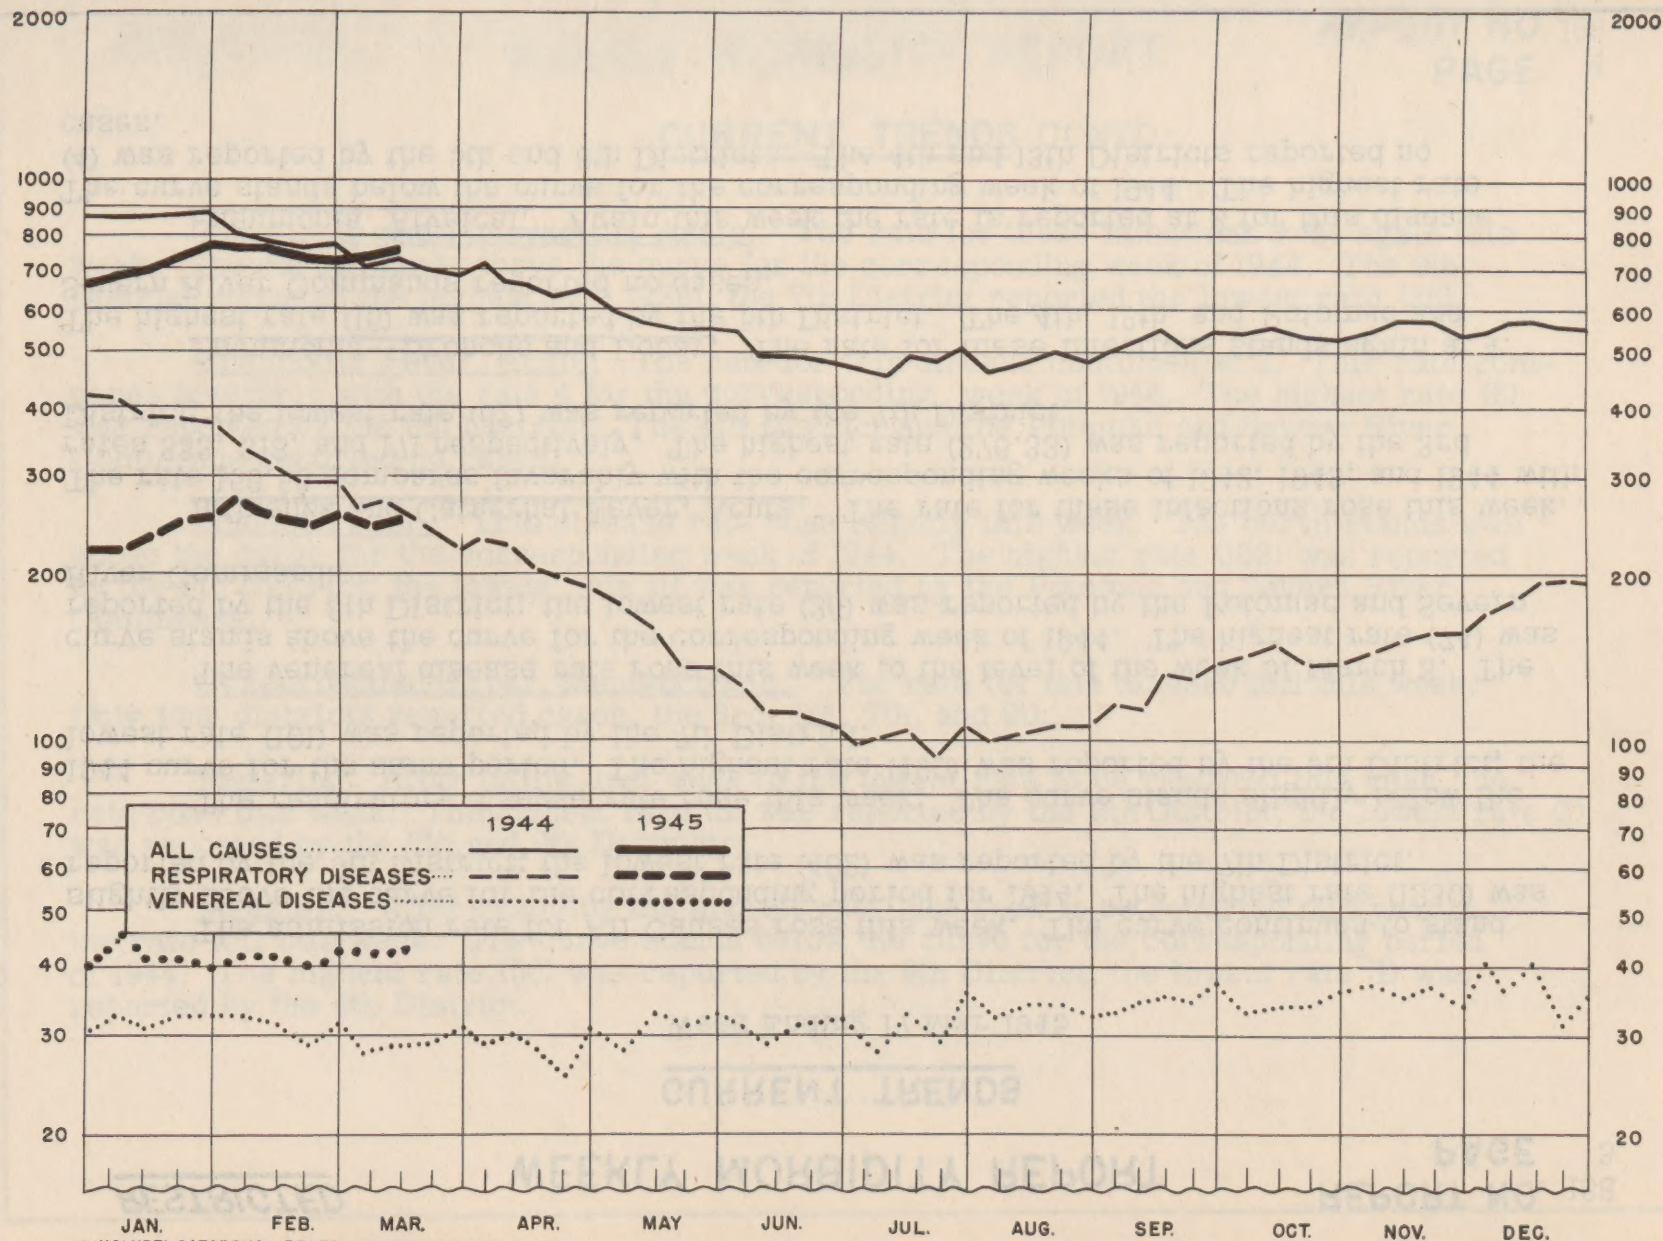

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES*, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1944 & 1945

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

RESTRICTED

CURRENT TRENDS

Week Ending 17 Mar 1945

The admission rate for All Causes rose this week. The curve continues to stand slightly above the curve for the corresponding period for 1944. The highest rate (1230) was reported by the 9th District; the lowest rate (482) was reported by the 7th District.

The respiratory disease rate rose this week. The curve stands slightly below the 1944 curve for the same period. The highest rate (490) was reported by the 9th District; the lowest rate (101) was reported by the 7th District.

The venereal disease rate rose this week to the level of the week of March 3. The curve stands above the curve for the corresponding week of 1944. The highest rate (74) was reported by the 8th District; the lowest rate (26) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these infections rose this week. The rate 156.56 compares favorably with the corresponding weeks of 1942, 1943, and 1944 with rates 333, 318, and 171 respectively. The highest rate (276.33) was reported by the 3rd District; the lowest rate (62) was reported by the 7th District.

Pneumonia--Broncho and Lobar. The rate for these infections stands again at 4. The highest rate (15) was reported by the 5th District. The 4th, 13th, and Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. Again this week the rate is reported at 2 for this disease. The curve stands below the curve for the corresponding week of 1944. The highest rate (4) was reported by the 5th and 8th Districts. The 4th and 13th Districts reported no cases.

REPORT NO. 168
PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections rose again this week. The curve stands above the curve for the corresponding week of 1944. The 9th District reported the highest rate (229); the 7th District reported the lowest rate (35).

Rheumatic Fever, Acute. The rate for this disease continues at 2. This rate compares favorably with the rate 4 for the corresponding week of 1944. The highest rate (5) was reported by the 9th District. The 4th District and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. This disease rate rose slightly this week. The curve stands well above the curve for the corresponding week of 1944. The highest rate (183) was reported by the 9th District; the lowest rate (1) was reported by the Potomac and Severn River Commands.

Cerebrospinal Fever, Menigococcic. The rate for this disease fell this week. Only four districts reported cases, the 3rd, 5th, 7th, and 9th.

Malaria. After falling last week to the lowest rate to be reported this year, the rate rose this week. The highest rate (8) was reported by the 6th District; the lowest rate (1) was reported by the 7th and 9th Districts.

Measles. After reaching the highest rate last week to be reported this year, the rate fell this week. The curve stands below the curve for the corresponding period of 1944. The highest rate (56) was reported by the 9th District; the lowest rate (1) was reported by the 4th District.
